热门技能

JAVA
MATLAB
C/C++

Languages

Japanese (Elementary)
English (Professional Working)
Chinese (Native or Bilingual)

Certifications

《可编程序控制系统设计师》国家职业资格证书 (二级)
Project Management Professional (PMP)

Honors-Awards

Annual Excellent Manager 2020
First Degree Scholarship
Second Prize of Science and Technology Talents Entrepreneurship Competition
Merit Student of Electrical and Automation Engineering School
Excellent Student Cadre of Electrical and Automation Engineering School

Publications

Impedance control for a lower-limb rehabilitation robot
The effect of crutch gait pattern on shoulder reaction force when walking with lower limb exoskeletons.

Patents

Xin Chen

R&D Director at Fourier Intelligence
中国 上海市 浦东新区

个人简介

Hi, I'm Xin Chen. My English name is Jason. I am now the Robotics Control System R&D Dept. Manager at Fourier Intelligence Co. Ltd. The Fourier Intelligence company is a famous company for manufacturing intelligent rehabilitation robots. I started to design and build my own robot since I was a university student. Since then, I fall in love with making robots, as it always brings me passion and fun. Till now, I have made plenty of different robots, including mobile robots, industrial arm robots, and exoskeleton robots. Meanwhile, I am a helpful person and making rehabilitation robots let me help others using my own hand. I'd like to combine my passion for building robots and the willingness to help others to continue building intelligence rehabilitation robot for those who need.

工作经历

Fourier Intelligence

8 年 1 个月

Robot Control System R&D Director

2021 年 7 月 - Present (4 年 10 个月)

Shanghai, China

Responsibility:

- R&D team organization and skill training, development process management.
- Cooperative research work management.
- The R&D work on human-robot interaction control, robot balance control, and reinforcement learning. (Using Matlab, Simulink, Linux, Python, C++)

Robot Control System R&D Manager

2019 年 7 月 - 2021 年 9 月 (2 年 3 个月)

Shanghai, China

An elbow rehabilitation driving device
and elbow rehabilitation equipment

A type of rehabilitation crutch

Data transmission method and
device, control method and device of
online robot, online robot

Control device and rehabilitation
robot based on gesture interactive
rehabilitation robot

Rehabilitation training equipment for
hip joint, pelvis and other parts of
children with cerebral palsy

Responsibility:

- Design and setup the robot control system framework. (Using C, Matlab, Simulink)
- Realize the robot control algorithm.
- Develop and maintenance the EXOPS open platform. (Using C, C#, Simulink, LabView, Java, Python)

Project Manager

2019 年 7 月 - 2020 年 4 月 (10 个月)

Shanghai City, China

Project Manager of the Product ExoMotus H4, an exoskeleton target for spinal cord injury individual users.

My dream realizes, all effort is worthy. :)

Algorithm Development Engineer

2018 年 4 月 - 2019 年 7 月 (1 年 4 个月)

Shanghai, China

Responsibility:

- Design and setup the robot control system framework. (Using STM32, C)
- Realize the robot control algorithm.
- Develop user-interface software. (Using UNITY, C#, Android, Java)
- Communication Protocol Design and Setup.

The City College of New York

Research Scholar

2018 年 4 月 - 2018 年 7 月 (4 个月)

Greater New York City Area

Responsibility:

- 3 months short-term research scholar.
- Help the team setup the gait detection related algorithm. (Using Arduino C++, Matlab)

Take part in the Toyota Mobility Challenge.

Lenovo

Software Engineer Intern

2016 年 5 月 - 2016 年 8 月 (4 个月)

Beijing City, China

Responsibility:

- Working as a part-time Software Engineer Intern.

- Help the colleagues in Lenovo to build an Excel-based data management software. (Using Java)

成都麦子信息技术有限公司

10 个月

Embedded Software Intern

2016 年 1 月 - 2016 年 6 月 (6 个月)

Beijing City, China

Responsibility:

- Learning to configure the Bootloader of the Linux System. (Using Assembly, C)
- Learning to configure the Linux System. (Using C)
- Learning to write hardware driver based on Linux System. (Using C)
- Developing applications based on Qt on Linux System. (Using Qt, C++)

IOS Software Intern

2015 年 9 月 - 2015 年 12 月 (4 个月)

Beijing City, China

Responsibility:

- Learning to code IOS devices. (Using Swift)

教育经历

University of Melbourne

Master of Philosophy - MPhil, Mechanical Engineering · (2019 - 2022)

Beihang University

Master's degree, Control Science and Engineering · (2015 - 2018)

Tianjin University

Bachelor's degree, Automation · (2011 - 2015)
